Fed up with paying for repairs to your Microwaves because of damage like this?

***£27 – £40 plus
engineer's fee**

Ceiling plate (roof liner)
damaged due
to food particles not
removed.

**Beyond
Economical
Repair**

Stirrer assembly
burnt out after leakage of
damaged seals

***£40 – £80 plus
engineer's fee**

Base plate (shelf)
cracked & seals
damaged by grease
penetration.

**Beyond
Economical
Repair**

Hole burnt in cavity
due to grease
penetration under
the base plate.

*Depending on microwave brand and model

Brilliantly Simple – Simply Brilliant

microsave[®]

by **REGALE**[®]
COMMERCIAL MICROWAVES. SINCE 1993

Every year businesses waste thousands of pounds paying for avoidable repairs on microwave ovens.

Unless the oven is spotless, the food or liquid that is left behind is heated and re-heated until it causes damage, which can be expensive to repair.

Damage that is not covered by the manufacturers warranty!

Microsave is the answer. A TPX Polycarbonate liner, custom designed for each microwave oven it fits. The Microsave protects the base, rear, sides and roof of the microwave.

The Microsave simply slides inside the cavity and is easily removed and washed.

microsave[®]

- Keeps your microwaves clean and working
- Keeps your operational expenses down
- Keeps your staff happy (nobody wants the job of cleaning the microwaves!)

*Depending on microwave brand and model

Burned Cavity = Beyond Economical Repair!

Here we have two pictures of the same oven.
The ceramic base plate (not shown) has been damaged, and liquid or grease has got into the mechanism underneath.

1. DAMAGED STIRRER

This picture shows the burned and damaged stirrer.

2. DESTROYED CAVITY BASE

This picture shows how the stirrer has arced with the oven base, cutting a hole into the stainless steel.

This oven would be **Beyond Economical Repair.**
Had a **microsave**[®] liner been fitted, none of this damage would have occurred.

Destroyed Roof Liner / Ceiling Plate

micro**save**®

by **REGALE**®
COMMERCIAL MICROWAVES, SINCE 1983

Here we show a burned and ruined roof liner/ceiling plate.

Highlighted in red are food particles in the vent.

The blue circles show where the food has caught fire.

The manufacturer would consider this misuse and would not cover the repair under warranty.

***£27 – £40**
plus engineer's fee

Note: Had the fire been worse, the oven would have been destroyed, with potentially even more catastrophic results.

*Depending on microwave brand and model

Don't just take our word for it, here's what the industry has to say...

COMMERCIAL MICROWAVES SINCE 1993

Cyrus Todiwala

Chef Patron - Café Spice Namaste

“The Microsave Cavity Liner is a simple, yet ingenious idea that essentially protects the interior of our microwaves, saving us time and money.

It is easily removed, washed and replaced for next service, time and time again, avoiding any burnt food particles which can potentially cause scorched ceiling plates or cracked base plates.

It's Simply Brilliant!”

Dean Snee

Head of Food - Orchid Pub Group

“Since the Cavity Protection System first came onto the market, it has been a “must”. Every new microwave within my kitchens has a liner fitted. Since taking over as the Head of Food for the Orchid Groups 290 pubs and restaurants, with every new microwave supplied, the group has insisted that a Cavity Protection System is included.”

Ryan Kinneavy

Head Chef – The Spyglass Inn

“We’ve been using the Microsave for several years and they’re brilliant. We were involved in testing out some prototypes when they were first being developed.

They’re easy to use and they cut back on general maintenance and daily caretaking and cleaning of the microwaves. We clean them three times a day after each shift. When you pull out the Microsave, the inside of the microwave is virtually clean; it just needs a quick wipe round.”

Contact

Regale Microwave ovens are the largest microwave oven specialist in the UK.

The three directors have over 100 years experience in supplying microwave ovens into the foodservice & Hospitality industries.

The Microsave Cavity Liner was invented by Regale in the early 2000's and is now sold across the globe, saving businesses untold amounts of money in avoidable repairs.
